

**MARYLAND HISTORICAL TRUST  
DETERMINATION OF ELIGIBILITY FORM**

Property Name: Delaware & Chesapeake Railroad Bridge 32.03 Inventory Number: CAR-368/  
QA-575

Address: over the Tuckahoe Creek Historic district: yes ☒ no

City: Queen Anne Zip Code: 21657 County: Queen Annes/Caro

USGS Quadrangle(s): Ridgely

Property Owner: Maryland Transit Administration Tax Account ID Number: N/A

Tax Map Parcel Number(s): N/A Tax Map Number: N/A

Project: modifications to the existing Delaware & Chesapeake Railroad Agency: Maryland Transit Administration

Agency Prepared By: STV Inc.

Preparer's Name: Joseph Schuchman Date Prepared: 7/6/2006

Documentation is presented in: A physical description of this resource may be found under Item 7, on the Maryland Inventory of  
Historic Properties Form; the significance of the resource is evaluated under Item 8.

Preparer's Eligibility Recommendation: Eligibility recommended ☒ Eligibility not recommended

Criteria: A B C D Considerations: A B C D E F G

*Complete if the property is a contributing or non-contributing resource to a NR district/property:*

Name of the District/Property: \_\_\_\_\_

Inventory Number: \_\_\_\_\_ Eligible: yes Listed: yes

Site visit by MHT Staff yes no Name: \_\_\_\_\_ Date: \_\_\_\_\_

**Description of Property and Justification:** *(Please attach map and photo)*

The Delaware & Chesapeake Bridge 32.03 crossing Tuckahoe Creek is not eligible for listing in the National Register. Under Criterion A, while the resource is associated with growth and development brought to the eastern shore by the presence of the railroad, the present appearance of this resource no longer illustrates that period of its history. Under Criterion B, Bridge 32.03 is not associated with the lives of persons significant in our past. Under Criterion C, the abandonment of the rail line and the subsequent deterioration of this bridge crossing inhibit the resource's ability to appropriately convey its early 20th century origin and use. The bridge crossing is vernacular in execution, does not embody the distinctive characteristics of a type, period or method of construction and does not represent the work of a master or possess high artistic values. This determination has been made in accordance with the National Register Bulletin entitled "How to Apply the National Register Criteria for Evaluation" (National Park Service 1988).

## 7. Description

CAR-368/

Inventory No. QA-575

### Condition

<input type="checkbox"/> excellent	<input type="checkbox"/> deteriorated
<input type="checkbox"/> good	<input type="checkbox"/> ruins
<input checked="" type="checkbox"/> fair	<input type="checkbox"/> altered

Railroad Bridge No. 32.03 is located north of Queen Anne Highway (Maryland Route 404) and carries the surviving track of the former Delaware and Chesapeake Railroad over the Tuckahoe Creek at the Caroline/Queen Anne County line (Figure 1). The single-track 180 foot long bridge (Photographs 1-11) was constructed in 1915.

At least one earlier railroad bridge carried the track over Tuckahoe Creek approximately 20 feet south of this location; no physical evidence of an earlier crossing survives and no information has yet come to light over the appearance of this earlier bridge (Bartosh). Historic Atlas Maps from 1875 (Figure 2), 1877 (Figure 3) and 1905 (Figure 4) consistently illustrate a bridge spanning the Tuckahoe Creek at this site (Isler, 1875; Griffin and Stevenson, 1877; USGS, 1905).

The bridge is functional in appearance and is comprised of four simple spans. Spans 1 and 4 have span lengths of 43'8" and Spans 2 and 3 have span lengths of 45'0" (Figures 5 and 6). The superstructure for each span consists of two riveted steel plate girders. The bridge deck consists of equally spaced structural timber ties placed on top of the plate girders. The superstructure is supported by three cast-in-place concrete tapered piers and two cast in-place concrete abutments with wing walls parallel to the centerline of the track. Piers and abutments have been scored to suggest the appearance of stone block construction.

Owing to abandonment of the rail line, and subsequent deterioration and vegetation, the bridge crossing at Tuckahoe Creek is now physically and visually isolated from the rail line with which it had been historically associated.

Evaluation for:

☒ National Register ☐ Maryland Register ☐ not evaluated

The precursor to the present abandoned rail system traces its origin to the mid-19<sup>th</sup> century. In 1854, the Maryland and Delaware Railroad was chartered to construct a 54- mile line between Smyrna Station (later Clayton) Delaware and Oxford Maryland. The rail line would offer passenger and freight system along Maryland's eastern shore and join the main north-south trunk of the Delaware Railroad at Clayton thus providing access to Wilmington, Philadelphia, Baltimore and New York. Construction on the line began in 1857 and by 1859 the line was graded and bridged as far as Greensboro. Work was interrupted by the Civil War and finally resumed in October 1865. The line reached Easton in 1869 and was subsequently completed with an extension to Oxford in 1871 (Fluharty, Talbot County Towns).

Archived notices which originally were posted in the local press illustrate progress in the railroad's construction:

Gazette, July 11, 1868

Frank G. Wright establishes a stage line between Ridgely, the terminus of the railroad, and Easton carrying the mail.

Gazette, January 9, 1868

Copying from the Denton Union, states that the Md. & De. Had been completed as far as Hillsborough, and that a contract had been drawn up for the construction of the road as far as Easton.

Gazette, March 6, 1869

The railroad between Hillsborough and Easton was in progress, and as it approached Easton it came a matter of serious discussion whether it should enter the town from the north and pass along West Street.

The following notice announced the completion of the Maryland and Delaware Railroad to Easton:  
Railroad Notice

On Tuesday, the 31<sup>st</sup> Inst., Cars will be left at Easton to take fruit to New York each day. A Car (sic) will be left at 3 o'clock P. M. and remain until 6 o'clock A.M. next day. An agent will take charge of the fruit. Rates given in freight list.

G. W. Goldsborough  
Superintendent

Gazette, November 13, 1869

On or after Monday Next (November 15, 1869) there will be one train a day to Easton which will bring the U. S. mail at present brought from Hillsborough by stage (Maryland Room Collection).

The Maryland and Delaware Railroad schedule dated May 22, 1871 (Figure 7) highlights service along the eastern shore and connections to larger urban areas along the east coast. One passenger train and one freight train operated daily, the freight train had a passenger car attached. The schedule noted freight needed to be at designated stations at least 30 minutes prior to train departure otherwise would have a 24 hour layover. This schedule predates the line's extension to Oxford which was completed later that same year. The railroad soon became a mainspring in the region's economy (Maryland Room Collection).

On December 20, 1877, bondholders foreclosed on the railroad's original builders and the line was reorganized as the Delaware and Chesapeake Railroad Company, a name by which it is continued to be identified on several late 19<sup>th</sup> and early 20<sup>th</sup> century maps (Fluharty). These same maps (Figures 2, 3 and 4) indicate the presence of a bridge crossing at or near the site of the present bridge (Isler, 1875; Griffin et al, 1877; USGS. 1905).

The nearby community of Queen Anne, originally called Morganville, is one of several towns which credit their existence to the coming of the railroad. The site of the town had been a cornfield on the farm of Colonel Charles Nichols until 1867, when the decision was made to place the railroad station west of Tuckahoe Creek instead of at nearby Hillsborough, near the creek's eastern side. Queen Anne became a two depot town in 1896 with the coming of the Maryland, Delaware and Virginia Railroad which operated a line across the Eastern Shore from Rehoboth and Lewes, Delaware to Love Point on Kent Island (Preston: 234).

In 1882, the railroad was acquired by the Philadelphia, Wilmington and Baltimore Railroad a division of the Pennsylvania Railroad. From 1882, the Delaware and Chesapeake was operated as a branch of the Pennsylvania railroad until the Pennsylvania went bankrupt in the 1970s. Ironically, the last section of the

railroad to be constructed would be the first to be abandoned; in the 1950s service along this line from Easton to Oxford was discontinued (Fluharty).

The present bridge crossing over Tuckahoe Creek was constructed in 1915 and may have been a component of overall infrastructure improvements. Speculative reasons for construction include increased usage of the line, increased tonnage of rail locomotives and equipment, and/or modifications necessitated by nearby track realignment. The 1915 Tuckahoe Creek Bridge is located approximately 20 feet north of the earlier Tuckahoe Creek crossing. There is no visible evidence of the former bridge (Bartosh).

A total of sixteen bridges carry the former Clayton to Easton line over roads and waterways. These structures span the years 1897 to 1968. The Tuckahoe Bridge is one of ten crossings which date from the first two decades of the twentieth century (State Railroad Administration's Bridge Inventory).

Beginning in 1977, the line operated as the Maryland & Delaware Railroad Company (MDDE) which had been incorporated on August 1, 1977 and designated by the States of Delaware and Maryland to operate various "light density" lines not included in the Conrail system. Freight traffic on the line notably decreased from over 1000 cars in 1976 to 200 in 1982 (Maryland Room Collection). After passenger service was discontinued, freight service and tourist excursions continued through the early 1980s although by 1982, freight service had been reduced to one trip per week. Under MDDE operations, the last freight train rolled down the rails on February 22, 1983 (Fluharty). The rail line was abandoned from 1983 to 1991. The privately-funded Chesapeake Railroad operated tourist excursions, dinner trains and freight operations from 1991 to 1995 (Bartosh).

Future plans envision the bridge site and adjoining rail corridor as a component of a planned expansion of the Easton-Clayton Rail Trail, a passive recreation trail.
